

Aerial UHF (21-50) 43 Element F Balun 4G 02MM-MDU43

The 02MM-MDU43 is a top of the line antenna with a F-type PBC balun, which makes it great for those looking for an antenna that can be installed quickly. It boasts X type elements, which increase gain and allow for improved wide-band performance. This model is UV-resistant and is sold individually as well as in five-packs.

Features and Benefits

- » X Type Elements for increased gain and wideband performance
- » F Type PCB balun for quick installation and improved VSWT
- » UV Resistant black plastics
- » Compact high visual impact packaging
- » Also available in 5 pack (02MM-MDU43-BULK)
