

The Hidden Media Hub is a recessed box used to house AV and power outlets behind wall mounted flat-screen TV's. It is specially designed so installers can easily hide cables in the wall cavity and provide easy access to all TV points. The paintable lid allows the Hidden Media Hub to blend in with existing decor making the hub the ideal solution to hide your home theatre cables. It is the first recessed hub designed for Australian and New Zealand electrical switch gear that is able to be mounted in a shallow wall with a minimum depth of 70mm. The Hidden Media Hub is suitable for a range of different applications.
